ISO 20915:2026-09 (E)

Life cycle inventory calculation methodology for steel products

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Basic conditions for LCI of steel products 5
4.1 General requirements 5
4.2 Function and declared unit 5
4.3 System boundary 5
4.4 Data quality 7
4.4.1 General 7
4.4.2 Time-related coverage 7
4.4.3 Geographical coverage 7
4.4.4 Technology coverage 7
4.4.5 Sources of the data 7
4.4.6 Primary data share 8
4.4.7 Data quality rating 8
4.4.8 Cut-off criteria 8

5 Methodological procedure for LCI calculation of steel products with provision for scrap recycling 8
5.1 General 8
5.2 Collecting data 9
5.2.1 General 9
5.2.2 Co-products 9
5.2.3 Ferrous raw materials 11
5.2.4 Process coal 11
5.2.5 Non-ferrous raw materials 12
5.2.6 Ferro alloy 12
5.2.7 Other input materials 12
5.2.8 Fuels 12
5.2.9 Process gases 12
5.2.10 Electricity 13
5.2.11 Steam 13
5.2.12 Sea water 13
5.2.13 Fresh water 13
5.2.14 Grey water 13
5.2.15 Industrial gases 13
5.2.16 Emissions to air, water and soil 14
5.2.17 Flares 14
5.2.18 Transportation 14
5.2.19 Waste for disposal 14
5.2.20 Packaging of steel products 14
5.3 Allocation procedure for co-products 14
5.3.1 General requirement 14
5.3.2 Application of system expansion with substitution to all co-products excluding slags from iron and steel production 14

5.3.3 Exclusions ... 15
5.4 Calculation of cradle-to-gate LCI without allocation for scrap input ... 15
5.5 Allocation for scrap recycling ... 16
5.5.1 General ... 16
5.5.2 LCI calculation methodology for scrap ... 16
5.5.3 Calculation of the burden for scrap input to produce the specific steel product under study ... 16

5.5.4 Calculation of the credits for scrap recovery ... 17

6 Reporting ... 17

7 Critical review ... 18

Annex A (informative) Calculation example of data quality rating ... 19

Annex B (normative) LCI calculations for electricity, steam and biogenic fuels ... 20

Annex C (informative) Example uses of co-products outside of the system boundary ... 22

Annex D (informative) Example for calculating Xpr ... 23

Annex E (informative) Details for calculating the scrap input rate ... 26

Annex F (informative) Example of LCI result reporting ... 28

Annex G (informative) Cross reference table of related standards ... 35

Bibliography ... 42
