European foreword 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 8
3.1 General terms and definitions 8
3.2 Terms and definitions relating to the appliance 8
3.3 Terms and definitions relating to gases and pressures 8
3.4 Terms and definitions relating to the parts of the appliance 8
3.5 Terms and definitions relating to operation 9
3.6 Additional terms and definitions relating to appliances having burners with an automatic burner control system 9
3.6.1 Terms and definitions relating to the parts of the appliance 9
3.6.2 Definitions concerning adjusting, control and safety devices 10
3.6.3 Terms and definitions relating to operation 11

4 Classification 14

5 Constructional requirements 14
5.1 General 14
5.1.1 Conversion to different gases 14
5.1.2 Materials 14
5.1.3 Ease of cleaning and maintenance 14
5.1.4 Strength 14
5.2 Special requirements 15
5.2.1 Taps 15
5.2.2 Knobs 15
5.2.3 Injectors and adjusters 15
5.2.4 Oven thermostats 15
5.2.5 Ignition systems 15
5.2.6 Flame supervision devices 15
5.2.7 Pressure Regulators 15
5.2.8 Hobs 15
5.2.9 Ovens and grills 16
5.2.10 Cylinder compartment 16
5.2.11 Appliances with a cooling fan 16
5.2.12 Accumulation of un-burnt gas 16
5.2.13 Additional requirements for appliances incorporating one or more burners that enable the user to program the delayed start and the end of a cooking cycle 16
5.2.14 Multifunctional controls 16
5.2.15 Shut-off valves 16
5.3 Requirements for appliances having one or more burners with an automatic burner control system 16
5.3.1 Indirect manually operated burner controls 16
5.3.2 Indirect manually operated knobs and touch control pads 18
5.3.3 Verification of the state of operation 19
5.3.4 Thermostats and gas energy regulators 19
5.3.5 Combustion products outlets (enclosed covered hob burners) 19
5.3.6 Multifunctional controls 19

5.3.7 Automatic shut-off valves ... 20
5.3.8 Accumulation of un-burnt gas ... 21
5.4 Requirements for burners having an automatic burner control system ... 22
5.4.1 General ... 22
5.4.2 Burners without a fan for the supply of combustion air and/or for the evacuation of the products of combustion ... 22
5.4.3 Burners with a fan for the supply of combustion air and/or for the evacuation of the products of combustion ... 25
5.5 Additional requirements for appliances with one or more burners that are capable of remote on-site operation ... 29
5.5.1 Application ... 29
5.5.2 General ... 29
5.5.3 Remote on-site operation ... 30

6 Operational requirements ... 30
6.1 General ... 30
6.1.1 Soundness ... 30
6.1.2 Obtaining the input rates ... 30
6.1.3 Flame supervision devices ... 30
6.1.4 Safety of operation ... 30
6.1.5 Heating ... 31
6.1.6 Temperature of the LPG cylinder and its compartment ... 31
6.1.7 Total input of the appliance ... 31
6.1.8 Pressure regulator performance ... 31
6.1.9 Blocking of the cooling fan and failure of the thermostat ... 31
6.2 Special requirements for hobs ... 31
6.2.1 Ignition, cross-lighting and flame stability ... 31
6.2.2 Combustion ... 31
6.3 Special requirements for ovens and grills ... 31
6.3.1 Ignition, cross-lighting and flame stability ... 31
6.3.2 Combustion ... 31
6.4 Additional requirements for appliances having burners with an automatic burner control system ... 32
6.4.1 Obtaining the input rates ... 32
6.4.2 Safety in the event of failure of thermostats and gas energy regulators ... 32
6.5 Additional requirements for hob burners having an automatic burner control system ... 33
6.5.1 Ignition, cross-lighting and flame stability ... 33
6.5.2 Combustion ... 34
6.5.3 Air proving devices (enclosed covered hob burners with a fan for the supply of combustion air and/or for the evacuation of products of combustion) ... 35
6.6 Additional requirements for oven and grill burners having an automatic burner control system ... 35
6.6.1 Ignition, cross-lighting and flame stability ... 35
6.6.2 Combustion ... 37
6.6.3 Air proving devices (oven and/or grill burners with a fan for the supply of combustion air and/or for the evacuation of products of combustion) ... 37

7 Test methods ... 38
7.1 General ... 38
7.1.1 Reference and test gases ... 38
7.1.2 Test pressures ... 38
7.1.3 Test procedures ... 38
7.1.4 Pans and oven and grill accessories ... 39
7.1.5 Temperature of the oven and grill ... 39
7.1.6 Appliances having a mains electrical supply ... 39
7.2 Verification of the constructional characteristics ... 39
7.2.1 Strength ... 39
7.2.2 Strength, stability ... 39
7.2.3 Appliances with a glass lid having a device for shutting off the gas to the hob burners ... 40
7.3 Verification of operational characteristics ... 40
7.3.1 General tests ... 40
7.3.2 Specific tests for hobs ... 42

7.3.3 Specific tests for ovens and grills 42
7.4 Verification of the constructional requirements specific to parts of the appliance having burners with an automatic burner control system 43
7.4.1 Accumulation of un-burnt gas 43
7.4.2 Manually operated devices (see 5.4.1) 44
7.4.3 Safety times 44
7.4.4 Appliances incorporating a hob having touch controls 44
7.5 Verification of the operational requirements specific to parts of the appliance having burners with an automatic burner control system 45
7.5.1 General tests 45
7.5.2 Specific tests for hobs 48
7.5.3 Specific tests for ovens and grills 57
7.6 Accuracy of measuring instruments 66

8 Marking and instructions 66
8.1 Marking 66
8.1.1 General 66
8.1.2 Marking and warnings on the appliance 66
8.1.3 Additional marking and warnings on the appliance 66
8.1.4 Marking and warning on the packaging 67
8.1.5 Additional marking on the packaging 67
8.2 Instructions general 67
8.3 Instructions for installation 67
8.3.1 General 67
8.3.2 Instructions for installation and adjustment 67
8.3.3 Additional instructions for installation 67
8.4 Instructions for use and maintenance 67

Annex A (informative) National situations 68

Annex B (informative) Guidelines for extension to other categories 69

Annex C (normative) Characteristics of the pans required 70

Annex D (normative) Surface temperature probe (7.3.1.5.3.2) 71

Annex E (normative) Use of the symbol on the appliance and packaging 72

Annex F (normative) Fault analysis procedure for assessing the safety of the appliance in the event of failure of any single automatic shut-off valve in the automatic burner control system 73

F.1 Procedure 73
F.2 Explanation of decisions taken during assessment of fault 74

Annex ZA (informative) Relationship between this European Standard and the essential requirements of EU Regulation 2016/426/EU aimed to be covered 76
