DIN EN 10083-1:2006-10 (E)

Steels for quenching and tempering - Part 1: General technical delivery conditions

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 5

3 Terms and definitions 6

4 Classification and designation 6
4.1 Classification 6
4.2 Designation 6

5 Information to be supplied by the purchaser 7
5.1 Mandatory information 7
5.2 Options 7

6 Manufacturing process 8
6.1 General 8
6.2 De-oxidation 8
6.3 Heat treatment and surface condition at delivery 8
6.4 Cast separation 8

7 Requirements 9
7.1 Chemical composition, hardenability and mechanical properties 9
7.2 Machinability 9
7.3 Shearability of semi-finished products and bars 9
7.4 Structure 9
7.5 Internal soundness 10
7.6 Surface quality 10
7.7 Dimensions, tolerances on dimensions and shape 10

8 Inspection 10
8.1 Testing procedures and types of documents 10
8.2 Frequency of testing 11
8.3 Tests to be carried out for specific inspection 11

9 Preparation of samples and test pieces 12
9.1 Selection and preparation of samples for chemical analysis 12
9.2 Location and orientation of samples and test pieces for mechanical tests 12
9.3 Location and preparation of samples for hardness and hardenability tests 12
9.4 Identification of samples and test pieces 12

10 Test methods 13
10.1 Chemical analysis 13
10.2 Mechanical tests 13
10.3 Hardness and hardenability tests 13
10.4 Retests 14

11 Marking, labelling, packaging 14

Annex A (normative) Ruling sections for the mechanical properties 18

Annex B (normative) Options **20**

Annex C (informative) Other relevant standards **22**

Annex D (informative) Dimensional standards applicable to products complying with this European Standard **23**

Annex E (informative) Determining the non-metallic inclusion content **24**
