DIN EN 54-21:2006-08 (E)

Fire detection and fire alarm systems - Part 21: Alarm transmission and fault warning routing equipment

Contents

Page

Foreword 4

1 Scope 6

2 Normative references 6

3 Terms, definitions and abbreviations 7
3.1 Terms and definitions 7
3.2 Abbreviations 7

4 General requirements 7
4.1 General 7
4.2 Compliance 7

5 Functional requirements 7
5.1 Alarm transmission routing equipment 7
5.2 Fault warning routing equipment 7
5.3 Indication of signals 8

6 Alarm transmission and fault warning systems requirements 8

7 Design requirements 8
7.1 General requirements and manufacturer's declarations 8
7.2 Documentation 9
7.3 Mechanical design requirements 9
7.4 Electrical and other design requirements 10
7.5 Integrity of transmission paths 10
7.6 Accessibility of indications and controls 10
7.7 Indications by means of light-emitting indicators 10
7.8 Colours of indications 10
7.9 Testing of indicators 10
7.10 Additional design requirements for software-controlled routing equipment 11
7.10.1 General requirements and manufacturer's declarations 11
7.10.2 Software documentation 11
7.10.3 Software design 12
7.10.4 Program monitoring 12
7.10.5 The storage of programs and data 12
7.10.6 The monitoring of memory contents 13

8 Marking 13

9 Power supply 13

10 Tests 13
10.1 General 13
10.1.1 Standard atmospheric conditions for testing 13
10.1.2 Specimen configuration 14
10.1.3 Mounting and orientation 14
10.1.4 Electrical connection 14
10.1.5 Provisions for tests 14
10.2 Functional test 14

10.2.1 Object of the test 14
10.2.2 Test schedule 14
10.3 Environmental tests 15
10.3.1 General 15
10.3.2 Tests for one specimen 16
10.3.3 Tests for more than one specimen 16
10.3.4 Requirements 16
10.4 Cold (operational) 16
10.4.1 Object of the test 16
10.4.2 Test procedure 16
10.5 Damp heat, steady state (operational) 17
10.5.1 Object of the test 17
10.5.2 Test procedure 17
10.6 Impact (operational) 18
10.6.1 Object of the test 18
10.6.2 Test procedure 18
10.7 Vibration, sinusoidal (operational) 19
10.7.1 Object of the test 19
10.7.2 Test procedure 19
10.8 Electromagnetic (EMC) immunity tests (operational) 20
10.9 Supply voltage variation (operational) 21
10.9.1 Object of the test 21
10.9.2 Test procedure 21
10.10 Damp heat, steady state (endurance) 21
10.10.1 Object of the test 21
10.10.2 Test procedure 21
10.11 Vibration, sinusoidal (endurance) 22
10.11.1 The object of the test 22
10.11.2 Test procedure 22

Annex A (normative) Performance requirements for alarm and fault warning transmission systems 24

Annex B (normative) Verification of performance requirements for alarm and fault warning transmission systems 25

B.1 General 25
B.2 Transmission time 25
B.3 Reporting time 25
B.4 Availability 25

Annex C (informative) Design requirements for software controlled routing equipments 26

Annex ZA (informative) Clauses of this European Standard addressing the provisions of the EU Construction Products Directive (89/106/EEC) 27

ZA.1 Scope and relevant clauses 27

ZA.2 Procedures for the attestation of conformity of alarm transmission and fault warning routing equipment covered by this standard 28

ZA.2.1 System of attestation of conformity 28

ZA.2.2 Evaluation of conformity 28

ZA.3 CE marking and labelling and accompanying documentation 32

ZA.4 EC certificate and declaration of conformity 34
