ISO 13000-2:2021 (E)

Plastics — Polytetrafluoroethylene (PTFE) semi-finished products — Part 2: Preparation of test specimens and determination of properties

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Sampling

5 Preparation of test specimens

6 Testing of semi-finished PTFE products

- 6.1 General
- 6.2 Linear dimensions
- 6.3 Tensile properties
- 6.3.1 Tensile specimens
- 6.3.1.1 General
- 6.3.1.2 Turned dumb-bell test specimens
- 6.3.1.3 Micro-tensile (small punched dumb-bell) test specimens
- 6.3.1.4 Test specimens prepared from thin or narrow tape and from small-diameter tubing of less than 7,0 mm ID
- 6.3.1.5 Test specimens prepared from small-diameter rod
- 6.3.1.6 Marking of test specimens
- 6.3.2 Procedure
- 6.4 Density
- 6.5 Loss in mass at 300 °C
- 6.6 Dimensional stability — General method
- 6.6.1 Apparatus
- 6.6.2 Test specimen
- 6.6.3 Procedure
- 6.6.4 Expression of results
- 6.7 Dimensional stability — Special method for the determination of the dimensional and the geometrical stability of thick-walled tubes
- 6.7.1 Apparatus
- 6.7.2 Test specimen
- 6.7.3 Procedure
- 6.7.4 Expression of results
- 6.8 Dielectric strength
- 6.9 Hardness
- 6.10 Colour
- 6.11 Resistance to environmental stress cracking (ESC)
