ISO 19426-5:2026-09 (E)

Structures for mine shafts - Part 5: Shaft system structures

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 2

5 Materials 5

6 Nominal loads 5
6.1 Permanent loads 5
6.1.1 Self-weight 5
6.1.2 Brow beams and sidewall support structures 5
6.1.3 Pipe supports 6
6.1.4 Conveyor supports 6
6.2 Imposed loads and load effects 6
6.2.1 General 6
6.2.2 Guide support structures 6
6.2.3 Fixed flare guides 12
6.2.4 Station structures 12
6.2.5 Rock loading structures 13
6.2.6 Operational arresting structures 13
6.2.7 Station dropsets 14
6.2.8 Pipe supports 14
6.2.9 Rope guide and rubbing rope anchor supports 15
6.2.10 Brattice walls 15
6.2.11 Strain loading 15
6.2.12 Ladderway loading 15
6.2.13 Conveyance drop test loads 16
6.2.14 Earthquake loads 16
6.3 Emergency loads 16
6.3.1 Emergency arresting structures 16
6.3.2 Emergency stopping devices 16
6.3.3 Pipe supports 16
6.3.4 Spillage winch support and sheave support structures 17
6.3.5 Brattice walls 17
6.3.6 Impact load on protective platforms 17

7 Design procedures 17
7.1 Design loads 17
7.2 Design codes 18
7.3 Design of emergency arresting structures 18
7.4 Design of emergency stopping device supports 18
7.5 Special design requirements for shaft steelwork in different shaft zones 18
7.5.1 Shaft zones 18
7.5.2 Shaft steelwork within shaft zone A 18
7.5.3 Shaft steelwork within shaft zone B 18

7.5.4 Shaft steelwork within shaft zone C 18
7.5.5 Shaft steelwork within shaft zone D 18
7.6 Additional limit states 19
7.6.1 Lateral displacement of conveyance 19
7.6.2 Fatigue 19
7.6.3 Rebound velocity ratio 19
7.6.4 Amplification of loads and load effects 19
7.7 Provision for wear and corrosion 21

7.8 Design of protective platforms 21

8 Construction requirements 21
8.1 General 21
8.2 Construction tolerances 21

Annex A (informative)Shaftzoneclassification 24

Annex B (informative)Shaftconditionclassification 25

Annex C (informative) Load factors and load combinations 28

Annex D (informative) Protective platforms 31
