ISO 19426-4:2026-09 (E)

Structures for mine shafts - Part 4: Conveyances

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 2

5 Materials 4
5.1 Steel 4
5.1.1 High strength steel grades 4
5.1.2 Cold temperature operation 4
5.2 Aluminium alloys 4
5.3 Critical load bearing components 4

6 Nominal operating loads 5

7 General operating loads 5
7.1 Permanent loads 5
7.2 Vertical imposed loads due to holding devices 5
7.2.1 Holding device engagement load 5
7.2.2 Holding devices securing load 5
7.3 Lateral imposed loads 6
7.3.1 Fixed guide systems in vertical shafts 6
7.3.2 Rope guide systems 6
7.3.3 Decline shaft conveyance wheel loads 6
7.4 Winder system loads 7
7.4.1 Acceleration/deceleration load 7
7.4.2 Trip-out load 7
7.4.3 Tail-rope load 8
7.4.4 Vertical friction load 8
7.5 Roof loads 8

8 Personnel winding loads 8
8.1 Standing personnel load 8
8.2 Seated personnel load 8
8.3 Loading of cages 8
8.4 Loading of cages in decline shafts 8
8.5 Dogging system load 8

9 Material and equipment winding loads 9
9.1 Floor loads 9
9.1.1 Static load 9
9.1.2 Impact loads 9
9.2 Slung loads or trailing loads 11

10 Rock winding loads 11
10.1 Skip loads 11

10.1.1 General ... 11
10.1.2 Static rock loads ... 11
10.1.3 Bridle and top transom loads during filling ... 11
10.1.4 Reference rock pressure ... 12
10.1.5 Pressure during filling or travelling in the shaft ... 12
10.1.6 Pressures during emptying ... 13
10.1.7 Load on tipping rollers ... 14
10.1.8 Skip return-stop loads ... 14
10.2 Kibble loads ... 14
10.2.1 Static rock or slurry loads ... 14

10.2.2 Reference rock or slurry pressure ... 14
10.2.3 Pressure during filling ... 14
10.2.4 Pressures during emptying ... 14
10.2.5 Heavy kibble payloads ... 15

11 Emergency loads ... 15
11.1 Rope emergency load ... 15
11.1.1 Permanent operating conveyances with fixed rope winders ... 15
11.1.2 Permanent operating conveyances with friction winders ... 15
11.1.3 Slung equipment and conveyances ... 15
11.1.4 Kibbles and kibble cross-heads ... 16
11.2 Emergency drop-back loads ... 16
11.2.1 General ... 16
11.2.2 All permanent conveyances ... 16
11.2.3 Kibbles and kibble cross-heads ... 16
11.3 Roof impact loads ... 16
11.4 Skip loads ... 16
11.4.1 General ... 16
11.4.2 Reference rock pressure ... 17
11.4.3 Pressure during filling or travelling in the shaft ... 17
11.5 Emergency stopping device loads ... 18
11.5.1 General ... 18
11.5.2 Overspeed device ... 18
11.6 Application of emergency loads ... 18

12 Design procedures ... 18
12.1 Design loads ... 18
12.2 Design codes ... 19
12.3 Design for emergency loads ... 19
12.3.1 Steel components ... 19
12.3.2 Aluminium components ... 19
12.3.3 Special considerations ... 19
12.4 Functional requirement ... 19
12.4.1 Aspect ratio ... 19
12.4.2 Ventilation requirements ... 19
12.5 Fatigue ... 19

13 Construction requirements ... 19
13.1 General ... 19
13.2 Confirmation of design by testing ... 20
13.2.1 Testing of operating mechanisms ... 20
13.3 Construction tolerances ... 20

Annex A (informative) Load factors and load combinations ... 22

Annex B (informative) Examples of tipping roller and skip return-stop loads ... 24

Annex C (informative) Construction tolerances ... 28

Bibliography ... 29
