DIN 55633-1:2021-03 (E)

Paints and varnishes - Corrosion protection of steel structures by powder coating systems - Part 1: Assessment of powder coating systems and execution of coating

Contents

Page

Foreword ... 4
Introduction ... 5
1 Scope ... 6
2 Normative references ... 6
3 Terms and definitions ... 8
4 Corrosivity categories ... 10
5 Corrosion protection systems ... 12
5.1 General ... 12
5.2 Powder coating materials ... 13
5.2.1 Piece work powder coating ... 13
5.3 Durability ... 13
5.4 Requirements ... 14
5.4.1 Powder coating materials ... 14
5.4.2 Surface preparation and surface pre-treatment ... 14
5.4.3 Execution of powder coating ... 16
5.4.4 Film thickness of powder coating systems for piece work powder coatings ... 16
6 Corrosion protection design of the components ... 16
7 Packaging, transport, storage and assembly of components ... 17
8 Subsequent processing of powder-coated components ... 17
9 Testing for quality assurance ... 17
9.1 General ... 17
9.2 Test pieces ... 17
9.3 Corrosion tests ... 18
9.3.1 General ... 18
9.3.2 Coating thickness ... 18
9.3.3 Condensation test ... 18
9.3.4 Salt spray test ... 19
9.3.5 Cross-cut test ... 19
10 Marking of the corrosion protection system ... 19
Annex A (informative) Examples of corrosion protection systems with assignment to corrosivity categories ... 25
Bibliography ... 28
