DIN 18218:2010-01 (E)

Pressure of fresh concrete on vertical formwork

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms, definitions and symbols 4
3.1 Terms and definitions 4
3.2 Symbols 6
3.3 Subscripts 6

4 Fresh concrete pressure 6
4.1 General 6
4.2 Design value of fresh concrete pressure 6
4.3 Distribution of fresh concrete pressure over the height of the formwork 7
4.4 Determination of the characteristic value of the maximum fresh concrete pressure 8

5 Parameters affecting the magnitude of fresh concrete pressure 9
5.1 General 9
5.2 End of setting 10
5.3 Temperature 10
5.4 Fresh concrete density 11
5.5 Compaction 11
5.6 Admixtures and additives 11
5.7 Vibrations 12
5.8 Reinforcement 12

Annex A (normative) Determination of setting times by the "knead bag" method 13

A.1 General 13
A.2 Apparatus 13
A.3 Sampling and test procedure 13
A.4 Test report 14

Annex B (normative) Diagrams to determine the maximum value of lateral fresh concrete pressure 15
