NA 2.1 General 4

NA 2.2 National provisions 4

Re 1 "General" 4

NCI re 1.1 (6) "Scope Part 3 of Eurocode 6" 4

NCI re 1.2 "Normative references" 4

NCI re 1.6 "Symbols" 5

Re 2 "Basis of design" 5

NDP re 2.3(2)P "Verification by the partial factor method" 5

Re 4 "Design of unreinforced masonry walls using simplified calculation methods" 6

NDP re 4.1(1)P "General" 6

NCI re 4.2.1.1 "General conditions" 6

NCI re 4.2.1.2 "Additional conditions" 8

NCI re 4.2.2.2 "Design vertical load resistance" 9

NDP re 4.2.2.3 (1) "Capacity reduction factor" 9

NCI re 4.2.2.3 "Capacity reduction factor" 9

NCI re 4.2.2.4 "Effective height of walls" 11

NCI re 4.3 "Simplified calculation method for walls subjected to concentrated loads" 13

NCI re 4.4.2 "Design shear resistance" 13

NCI re 4.5 "Simplified calculation method for basement walls subject to lateral earth pressure" 13

NCI re Annex A "Simplified calculation method for unreinforced masonry walls of buildings not greater than 3 storeys" 13

NCI re Annex B "Simplified calculation method for the design of internal walls not subject to vertical loads and with limited lateral load" 14

NCI re Annex C "Simplified calculation method for the design of walls subjected to uniform lateral design load and no vertical loads" 14

uniform lateral design load and no vertical loads 15

Re Annex D "Simplified method of determining the characteristic strength of masonry" 16

NDP re Annex D.1 "Characteristic compressive strength" 16

NDP re D.2 Characteristic flexural strength 21

NDP re D.3 Characteristic initial shear strength 21
