DIN EN 15684:2021-05 (E)

Building hardware - Mechatronic cylinders - Requirements and test methods

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Requirements 10
4.1 General 10
4.2 Category of use 10
4.3 Durability requirements 11
4.4 Fire/smoke resistance 12
4.5 Environmental resistance 12
4.6 Key related security 13
4.7 System management 18
4.8 Attack resistance requirements 19
4.9 Requirements for product information 22

5 Testing, assessment and sampling methods 23
5.1 General 23
5.2 Operational test 23
5.3 Performance tests 25
5.4 Category of use 25
5.5 Durability tests 27
5.6 Fire/smoke resistance tests 28
5.7 Environmental resistance tests 28
5.8 Key related security 30
5.9 System Management 32
5.10 Attack resistance tests 32

6 Classification system 41
6.1 Classification 41
6.2 Category of use (1st character): 41
6.3 Durability (2nd character): 41
6.4 Fire/smoke resistance (3rd character): 41
6.5 Environmental resistance (4th character): 41
6.6 Mechanical key related security (5th character): 42
6.7 Credential related security (6th character): 42
6.8 System Management (7th character): 42
6.9 Attack resistance (8th character): 42
6.10 Example of classification 42

7 Marking 42

Annex A (normative) Suitability for use on fire/smoke resistant doors 43

Annex B (normative) Tool sets for attack resistance tests 44

Annex C (normative) Table of test procedure 46

Annex D (informative) Manufacturer's declaration of compliance 48

Annex E (informative) Examples of calculation of effective code variations for ICC 50
