ISO 19426-3:2026-09 (E)

Structures for mine shafts - Part 3: Sinking stages

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 2

5 Materials 4
5.1 Steel 4
5.1.1 Structural steel grades 4
5.1.2 High strength steel grades 4
5.2 Aluminium alloys 4

6 Nominal loads 4
6.1 Permanent load 4
6.2 Imposed loads 4
6.2.1 Stage deck load 4
6.2.2 Shaft formwork winch load 5
6.2.3 Kibble cross-head support load 5
6.2.4 Jumbo unit load 5
6.2.5 Lashing unit load 6
6.2.6 Stage jack load 6
6.2.7 Stage skid load 6
6.2.8 Canopy load 6
6.2.9 Kibble guide load 7
6.2.10 Temporary stage support load 7
6.2.11 Blast load 7
6.2.12 Guard railing load 7
6.2.13 Special load 7
6.3 Emergency load 8
6.3.1 Emergency rope load 8
6.3.2 Emergency impact load 8

7 Design procedures 8
7.1 Design loads 8
7.2 Design codes 8
7.3 Load reversal 8
7.4 Design of replaceable members 8
7.5 Impact energy design of top deck 9
7.6 Deflection limitations 9
7.7 Stability consideration 9

Annex A (informative) Load factors and load combinations 10

Annex B (informative) Examples of jumbo unit loads 12

Annex C (informative) Examples of lashing unit loads 15

Annex D (informative) Examples of stage jack loads with lashing 20

Bibliography 24
