ISO/TR 22849:2011-04 (E)

Design recommendations for bevel gears

Contents

Page

Foreword iv

1 Scope 1

2 Symbols, descriptions and units 1

3 Application 3
3.1 Geometry 3
3.2 Rating 3
3.3 Materials 4
3.4 Gear tolerances 4
3.5 Gear noise 4

4 Manufacturing consideration 8
4.1 Outline of production methods and their features -- Face milling and face hobbing 8
4.2 Blank design and tolerances 9
4.3 Assembly 18
4.4 Tooth contact pattern 23

5 Strength considerations 25
5.1 Effect of hypoid offset 25
5.2 Effect of cutter radius 25
5.3 Bevel gear mountings 27
5.4 Direction of forces 29

6 Efficiency considerations 29
6.1 Hypoid and bevel gear mesh efficiency 29
6.2 Lubrication 33

Bibliography 37
