ISO 7971-2:2019 (E)

Cereals — Determination of bulk density, called mass per hectolitre — Part 2: Method of traceability for measuring instruments through reference to the international standard instrument

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Requirements

- 4.1 Certified international or national standard instrument
- 4.2 National standard instrument
- 4.3 Secondary or internal standard instrument
- 4.4 Routine measuring instrument

5 Principle

6 Apparatus

7 Procedure

- 7.1 Traceability of national standard instruments through reference to the certified international or national standard instrument
- 7.1.1 General description
- 7.1.2 Preparation of the test samples
- 7.1.3 Use of the referenced test samples
- 7.1.4 Interpretation of the results
- 7.1.5 Adjustment of the national standard instrument
- 7.2 Traceability of the secondary standard instruments through reference to the national standard instrument
- 7.2.1 General description
- 7.2.2 Preparation of the test samples
- 7.2.3 Use of the referenced test samples
- 7.2.4 Interpretation of the results
- 7.2.5 Adjustment of the secondary standard instrument
- 7.3 Verification of instruments in operation
- 7.3.1 General description
- 7.3.2 Preparation of the control test samples
- 7.3.3 Use of the referenced test samples
- 7.3.4 Interpretation of the results
- 7.3.5 Adjustment of the instrument

8 Monitoring of instrument performance

9 Test reports

- 9.1 Analysis certificate
- 9.2 Conformity certificate

10 Identification of traced measuring instruments

Annex A (normative) Method for calculation of performance parameters of standard instruments and of measurement instruments

- A.1 Principle
- A.2 Control of the freedom from bias by comparison of means

A.3 Calculation of coordinates of the straight regression line and signification tests
A.4 Test for slope
A.5 Test for intercept
A.6 Interpretation and conclusion
A.6.1 Performances of a standard instrument
A.6.2 Performances of a measurement instrument
A.7 Example of calculations
A.7.1 Traceability of a standard instrument to a superior-level standard instrument
A.7.1.1 General
A.7.1.2 Calculation and tests for slope and intercept
A.7.1.3 Comparison of means
A.7.2 Traceability of a measurement instrument
A.7.2.1 General
A.7.2.2 Test for comparison of means
A.8 Example of calculations using data analysis tool in Microsoft® Excel©1)
A.8.1 Comparison of means
A.8.2 Calculation and tests for slope and intercept

Annex B (informative) Example — Owners of certified standard measurement instruments
