ISO 27852:2011-07 (E)

Space systems - Estimation of orbit lifetime

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms, definitions, symbols and abbreviated terms 1
2.1 Terms and definitions 1
2.2 Symbols 4
2.3 Abbreviated terms 4

3 Orbit lifetime estimation 4
3.1 General requirements 4
3.2 Definition of orbit lifetime estimation process 5

4 Orbit lifetime estimation methods and applicability 5
4.1 General 5
4.2 Method 1 -- High-precision numerical integration 6
4.3 Method 2 -- Rapid semi-analytical orbit propagation 6
4.4 Methods 3 -- Numerical table look-up, analysis and fit equation evaluations 7
4.5 Orbit lifetime sensitivity to sun-synchronous and high-eccentricity orbits 7

5 Atmospheric density modelling 7
5.1 General 7
5.2 Atmospheric drag models 7
5.3 Long-duration solar flux and geomagnetic indices prediction 9
5.4 Atmospheric density implications of thermospheric global cooling 14

6 Estimating ballistic coefficient 14
6.1 General 14
6.2 Estimating drag coefficient 15
6.3 Estimating cross-sectional area with tumbling and stabilization modes 15
6.4 Estimating mass 16

Annex A (informative) Space population distribution 17

Annex B (informative) 25-Year lifetime predictions using random draw approach 20

Annex C (informative) Solar radiation pressure and 3rd-body perturbations 25

Bibliography 27
