Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Fundamentals 4
4.1 General material for determination of emitted vibration power 4
4.2 Expression of vibration power in different forms 7

5 Measurement 8
5.1 Vibration transducers arrangement 8
5.2 Typical signal processing for evaluation of acceleration cross-spectrum 11
5.3 Metrological specifications 11

6 Test procedures 12
6.1 Choice of number of vibration isolators to measure from 12
6.2 Transducer placement and determination of maximum frequency 12

7 Measurement uncertainty 13

8 Data presentation and test report 13

Annex A (informative) Construction of dynamic stiffness matrix of vibration isolators 15

Annex B (informative) Examples of simple geometries and linear components of dynamic stiffness matrix for massless isolators 16

Bibliography 18
