

ISO 20785-4:2019 (E)

Dosimetry for exposures to cosmic radiation in civilian aircraft — Part 4: Validation of codes

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
3.1	Quantities and units
3.2	Atmospheric radiation field
3.3	Software terms
4	General considerations
5	Functionality
5.1	General
5.2	Measured data
5.3	ICRU reference data
5.4	Code validation using measurements or reference data
5.5	Considerations for the routine dose assessment
