DIN EN 16319:2026-11 (E)

Inorganic fertilizers and liming materials - Determination of specific elements - Determination of cadmium, chromium, copper, lead, nickel and zinc by inductively coupled plasma-atomic emission spectrometry (ICP-AES) after aqua regia dissolution

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Principle 5

5 Sampling and sample preparation 6

6 Reagents 6

7 Apparatus 7

8 Procedure 7
8.1 General 7
8.2 Preparation of the test solution - sample digestion 7
8.3 Preparation of the test solution for the correction of matrix effects by spike recovery 8
8.4 Preparation of the blank test solution 8
8.5 Preparation of the calibration solutions for the analysis of cadmium, chromium, copper, lead, nickel and zinc 8
8.6 Determination of cadmium, chromium, copper, lead, nickel and zinc by ICP-AES 9
8.6.1 Instrument conditions 9
8.6.2 Measurement 9
8.6.3 Interferences 9

9 Calculation and expression of the results 11
9.1 General 11
9.2 Correction for spike recovery 11
9.3 Calculation of the element content in the sample 11

10 Precision 12
10.1 Inter-laboratory study 12
10.2 Repeatability 12
10.3 Reproducibility 12

11 Test report 15

Annex A (informative) Adjustment of the procedure to different final volumes 16

Annex B (informative) Results of the inter-laboratory study 17
