

ISO/IEC 14543-4-2:2008-05 (E)

Information technology_ - Home electronic system (HES) architecture_ - Part_4-2: Communication layers_ - Transport, network and general parts of data link layer for network enhanced control devices of HES Class_1

CONTENTS

FOREWORD.....	4
INTRODUCTION	5
1 Scope.....	6
2 Normative references.....	6
3 Terms, definitions and abbreviations	7
3.1 Terms and definitions.....	7
3.2 Abbreviations	9
4 Conformance	9
5 Frame format of communication layers.....	10
6 Requirements for the physical layer and independent data link layer.....	10
6.1 Requirements for the physical layer	10
6.2 Functions of the data link layer	11
6.3 Possible media and their impact on layer-2.....	11
6.4 Data link layer services	11
6.4.1 Data link header	11
6.4.2 Data link address.....	12
6.4.3 Application data counter	15
6.4.4 Data link split frames.....	15
6.4.5 Data link data counter	16
6.5 Protocol difference absorption processing block	16
6.5.1 Overview	16
6.5.2 Message receipt/assembly processing	17
6.5.3 Message splitting/transmission processing.....	17
6.5.4 Address conversion processing.....	17
6.5.5 Communications type conversion processing	18
6.5.6 Common lower-layer communications interface processing	18
7 Requirements for the network layer.....	19
7.1 Overview	19
7.2 Received message determination processing	19
7.2.1 Overview	19
7.2.2 Received message identification processing specifications for nodes without the data link router function	19
7.2.3 Specifications for the received message identification processing for data link routers.....	20
7.3 Routing processing.....	21
7.3.1 Overview	21
7.3.2 Routing processing for nodes without the data link router function.....	21
7.3.3 Routing processing for data link routers.....	21
7.4 Send message creation/management processing	24
8 Requirements for the transport layer	24
Annex A (informative) API functions.....	25
A.1 API function for application layer	25
A.2 API functions for individual lower-layer communications interface.....	25
A.2.1 General	25

A.2.2 List of individual low-layer communication interface functions	25
A.2.3 Individual lower-layer communication interface detail specifications	26
A.2.4 Initial Setting Information Specifications	49
Bibliography.....	52
Figure 1 – Relationship between the protocol of ISO/IEC 14543-4 and OSI reference model	6
Figure 2 – Data link frame format of communication layers	10
Figure 3 – Configuration of DHD	11
Figure 4 – Configuration of SDLA and DDLA for individual address.....	12
Figure 5 – DDLA (broadcast-stipulated) address configuration.....	13
Figure 6 – Broadcast target requirement code	14
Figure 7 – Node group requirement bit specifications.....	15
Figure 8 – Format for protocol difference absorption processing section	15
Figure 9 – Relationship with upper-layer messages	16
Figure 10 – Configuration of DDC	16
Figure 11 – Subnet connections.....	22
Table 1 – Number of hop counts	12
Table 2 – NetID codes	13
Table 3 – DDLA (broadcast-stipulated) address configuration.....	14
Table A.1 – List of individual low-layer communication interface functions	25
Table A.2 – Node address description map.....	47
