DIN EN 14879-3:2007-02 (E)

Organic coating systems and linings for protection of industrial apparatus and pl ants against corrosion caused by aggressive media - Part 3: Coatings on concrete components

Contents

Page

Foreword 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 8

4 Surface protection systems and selection criteria 9

Surface protection types and system 9
4.1 9 4.2 Selection criteria 10
4.2.1 General 10
4.2.2 Exposing media 10
4.2.3 Type and frequency of fluid loading 12
4.2.4 Thermal loading 12
4.2.5 Changes in temperature 12
4.2.6 Mechanical loading 13
4.2.7 Weather factors 13
4.2.8 Additional requirements 14
4.3 Load profile 14

5 Coatings 14
5.1 Concrete structure and surface appearance 14
5.2 Coating materials 14
5.3 Coating system 14
5.3.1 General 14
5.3.2 Properties of coatings 15
5.3.3 Impregnating agents 16
5.3.4 Primers 16
5.3.5 Intermediate layers 16
5.3.6 Trowelled coatings 17
5.3.7 Self-levelling coatings 17
5.3.8 Laminate layer 17
5.3.9 Top coat 17
5.3.10 Waterproofing layer 18
5.3.11 Screed 18
5.3.12 Sealant 18
5.4 Coating system components 18
5.4.1 General 18
5.4.2 Binders 19
5.4.3 Fillers and aggregates 19
5.4.4 Reinforcing materials 19
5.4.5 Processing aids 20
5.5 Reinforcing materials for laminate layers 20
5.6 Reinforcing materials for top coats 20
5.7 Coatings 20
5.8 Safety measures for storage, processing and waste disposal 21

6 Designations 21

7 Testing 22
7.1 General 22
7.2 Suitability testing 22
7.3 Receiving inspection of coating materials 23
7.3.1 General 23
7.3.2 Marking 23
7.3.3 Viscosity 23
7.3.4 Density 23
7.3.5 Colour 23
7.3.6 Non-volatile matter content 23
7.3.7 Binders 23
7.4 Tests during application of coating 23
7.4.1 General 23
7.4.2 Suitability of concrete surface 23
7.4.3 Ambient conditions 23
7.4.4 Coating process 24
7.4.5 Individual layer thickness 24
7.5 Acceptance testing 24
7.5.1 General 24
7.5.2 Testing of coated component parts 24
7.5.3 Testing carried out on test panels 25
7.6 Inspection report 25

8 Suitability verification and tests 25
8.1 Requirements 25
8.1.1 General 25
8.1.2 Fluid load, chemical resistance and tightness 25
8.1.3 Thermal loads 25
8.1.4 Temperature change loads 26
8.1.5 Mechanical loads 26
8.1.6 Anti-slip properties 26
8.1.7 Crack bridging 26
8.1.8 Adhesion strength 27
8.1.9 Ageing behaviour 27
8.1.10 Weathering behaviour 27
8.1.11 Concrete compatibility 27
8.1.12 Behaviour in cleaning and neutralisation processes 27
8.1.13 Behaviour against micro-organisms 28
8.1.14 Electrostatic dissipating capability 28
8.1.15 Behaviour in fire 28
8.2 Tests 28
8.2.1 General 28
8.2.2 Coatings 29

Annex A (informative) Specimen form 42

Annex B (informative) Selection criteria for surface protection systems 43

B.1 Load profiles and suitable surface protection systems for floors and walls 43
B.2 Load profiles and suitable surface protection systems for secondary containments 44
B.3 Load profiles and suitable protection for production plant floors 45
B.4 Load profiles and suitable protection for gutters, trenches, pipes etc 46
B.5 Load profiles and suitable protection for containers 47

Annex C (informative) Acceptance inspection report 48

Annex D (normative) Overview of verification of suitability for coatings 49

Annex E (normative) Test fluid groups for verification of suitability for material/media combinations 50

Annex F (normative) Manufacture of test panels for coatings 53

Annex G (normative) Testing the electrostatic dissipation capability 56

G.1 General 56
G.1.1 Dissipation resistance 56
G.1.2 Ground dissipating resistance 56
G.2 Testing the dissipation resistance of test samples 56
G.2.1 Instruments 56
G.2.2 Test procedure 56
G.2.3 Test report 56
G.3 Measuring the ground dissipation resistance on the laid surface protection system 57
G.3.1 Instruments 57
G.3.2 Preparation 57
G.3.3 Test procedure 57
G.3.4 Test report 58

Annex H (informative) Information to be given by the coating material manufacturer 59

A-Deviation: National deviation due to regulations, the alteration of which is for the time being outside the competence of the CEN/CENELEC member 60
