DIN EN ISO 13927:2023-12 (E)

Plastics - Simple heat release test using a conical radiant heater and a thermopile detector (ISO 13927:2023)

Contents

Page

European foreword **4**

Foreword **5**

Introduction **6**

1 Scope **7**

2 Normative references **7**

3 Terms and definitions **7**

4 Symbols **8**

5 Principle **8**

6 Apparatus **8**
6.1 General 8
6.2 Cone-shaped radiant electrical heater 10
6.3 Heat flux controller 10
6.4 Chimney and thermopiles 11
6.5 Specimen holder 11
6.6 Retainer frame 11
6.7 Fume extraction system 13
6.8 Ignition circuit 14
6.9 Ignition timer 14
6.10 Heat flux meter 14
6.11 Calibration burner 14
6.12 Data collection system 14

7 Suitability of a product for testing **16**
7.1 Surface characteristics 16
7.2 Asymmetrical products 16
7.3 Thin materials 16
7.4 Composite specimens 16
7.5 Dimensionally unstable materials 16
7.6 Materials that require testing under compression 17

8 Specimen construction and preparation **18**
8.1 Specimens 18
8.2 Conditioning of specimens 18
8.3 Preparation 19
8.3.1 Specimen wrapping 19
8.3.2 Specimen preparation 19
8.3.3 Preparing specimens of materials that require testing under compression 19

9 Calibration **20**
9.1 Heater calibration 20
9.2 Thermopile calibration 20
9.2.1 General 20
9.2.2 Initial calibration 20
9.2.3 Daily calibration 21

10 Test procedure **21**
10.1 General precautions 21
10.2 Initial preparation 21

10.3 Procedure 22
11 Precision **22**
12 Test report **22**
Annex A (normative) **Calibration of the heat flux meter** **24**
Annex B (informative) **Guidance notes for operators** **25**
Annex C (informative) **Guidance on measuring mass loss during testing** **26**
Annex D (informative) **Example of thermopile calibration — Relation of heat release and thermopile output** **27**
Annex E (informative) **Calculation of effective critical heat flux for ignition** **29**
Bibliography **30**
