DIN EN 15316-4-5:2017-09 (E)

Energy performance of buildings - Method for calculation of system energ y requirements and system efficiencies - Part 4-5: District heating and cooling, Module M3-8-5, M4-8-5, M8-8-5, M11-8-5

European foreword 3

Introduction 4

1 Scope 6

2 Normative references 8

3 Terms and definitions 8

4 Symbols and subscripts 9

5 Indicators 9
5.1 General 9
5.2 Output data 9
5.3 Input data and calculation time step 10

6 Calculation methods for energy performance indicators 10
6.1 Simplified approach 10
6.1.1 General 10
6.1.2 Single-output district energy systems 10
6.1.3 Multi-output district energy systems 11
6.2 Detailed calculation rules 11
6.2.1 General 11
6.2.2 Generation-related calculation rules 12
6.2.3 Distribution-related calculation rules 17

7 Calculation of energy source indicators 18
7.1 Renewable energy ratio 18
7.2 Waste heat ratio 19
7.3 Cogenerated heat ratio 20

8 Report 20

Annex A (normative) Template for choices, input data and references 21

A.1 General 21
A.2 References 21
A.3 Default values for energy carriers 22
A.4 Distribution systems 22
A.5 Reference values 23
A.6 Method selection 23

Annex B (informative) Default choices, input data and references 24

B.1 General 24
B.2 References 24
B.3 Default values for energy carriers 25
B.4 Distribution systems 26

B.5 Reference values 27
B.6 Default method selection 28
