DIN EN 71-20:2026-02 (E)

Safety of toys - Part 20: Microbiological safety of toys containing accessible aqueous media

Contents

Page

European foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 General 8

5 Risk assessment and exemptions from testing 9
5.1 Exemption from Clause 6 9
5.2 Exemption from Clause 7 9

6 Microbiological cleanliness 9
6.1 Microbiological cleanliness requirements 9
6.1.1 Total aerobic microbial count (TAMC) and bile-tolerant gram-negative bacteria 9
6.1.2 Specified organisms 11
6.2 Microbiological cleanliness test methods 11

7 Microbiological challenge (preservation effectiveness) 12
7.1 Preservation effectiveness requirements 12
7.2 Preservation effectiveness test method 12

Annex A (informative) Background and rationale for this European Standard 13

A.1 Scope 13
A.2 Risk assessment and exemptions from testing 13
A.3 Microbiological cleanliness 14
A.4 Microbiological challenge (preservation effectiveness) 14

Annex B (informative) Process water -- Manufacturing aqueous toy materials 15

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2009/48/EC (OJ L 170, 30.6.2009, p. 1) aimed to be covered 16
