ISO 7194:2008-07 (E)

Measurement of fluid flow in closed conduits - Velocity-area methods of flow measurement in swirling or asymmetric flow conditions in circular ducts by means of current-meters or Pitot static tubes

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Symbols 2

4 Principle 2

5 Choice of measuring plane 3

6 Devices for improving flow conditions 3

7 Measurement of local velocities 7

8 Determination of mean flow velocity 14

9 Accuracy of flow-rate estimation 14

Annex A (normative) Detection and removal of regular pressure fluctuations 17

Annex B (normative) Damping of manometers 18

Annex C (normative) Calculation of Pitot static tube locations for method B 20

Annex D (normative) Corrections to be applied when a Pitot static tube is used 22

Annex E (normative) Corrections to be applied when a current-meter is used 23

Annex F (normative) Errors due to non-axisymmetrical velocity distribution 26
