Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Notation 3
4.1 General 3
4.2 Rule formatting 3
4.3 Rule tokens 3
4.4 Bitstream examples 3

5 Language concepts and lexical elements 4
5.1 Character set 4
5.2 Whitespace 5
5.3 Case sensitivity 5
5.4 Comments 5
5.5 Identifiers 5
5.6 Punctuators 6
5.7 Keywords 6
5.8 Operators 7
5.8.1 List of operators 7
5.8.2 Operator precedence and associativity 8
5.8.3 Specific operator behaviour 8
5.9 Expressions and evaluation 9
5.10 Statements 9
5.11 Built-in operators 10
5.12 Numbers 12
5.12.1 Endianness 12
5.12.2 Representation of numbers 12
5.12.3 Number limits 12
5.12.4 Value coercion 12
5.13 Logic values 13
5.14 Binary literal values 13
5.15 Hexadecimal literal values 14
5.16 Multiple character literal values 14
5.17 Integer, decimal and floating-point literal values 15
5.18 String literal values 16
5.19 Scope 17
5.19.1 General 17
5.19.2 Parsed variable scope 18
5.19.3 Computed variable scope 18
5.20 SDL specification limits 19

6 Elementary data types 19
6.1 General 19
6.2 Constant-length direct representation bit fields 20

6.2.1 Alignment 20
6.2.2 Type 20
6.2.3 Length 21
6.2.4 Value 21
6.2.5 Constants 21
6.2.6 Look-ahead 22
6.2.7 Legacy 22
6.2.8 Reserved 23
6.3 Variable length direct representation bit fields 23

6.4 Constant-length indirect representation bit fields 24
6.5 Variable length indirect representation bit fields 26
6.6 Variable length strings 27
6.7 String value 28

7 Composite data types 28
7.1 Classes 28
7.2 Base and derived classes 29
7.3 Abstract classes 30
7.4 Polymorphism in class declaration 31
7.4.1 General 31
7.4.2 Polymorphism for abstract classes 33
7.5 Expandable classes 33
7.6 Parameter types 35
7.7 Arrays 39
7.7.1 General 39
7.7.2 Alignment 40
7.8 Multi-dimensional arrays 40
7.9 Partial arrays 41
7.10 Implicit arrays 43

8 Computed variables 44
8.1 General 44
8.2 Elementary data types 44
8.2.1 Value 45
8.3 Arrays 45
8.4 Multi-dimensional arrays 45

9 Syntacticflowcontrol 46
9.1 General 46
9.2 Conditionals 46
9.3 Loops 49

Annex A (informative) SDL user guide 53

Bibliography 57
