ISO 14624-2:2023-10 (E)

Space systems - Safety and compatibility of materials - Part 2: Determination of flammability of electrical-wire insulation and accessory materials

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Test materials 3

5 Electrical-wire insulation flammability test in a static environment (test A) 3
5.1 Principle 3
5.2 Reagents 3
5.3 Test system 4
5.4 Test specimens 6
5.4.1 Reception and inspection of material 6
5.4.2 Preparation of test specimens 7
5.5 Procedure 7
5.5.1 General 7
5.5.2 Before testing 7
5.5.3 Test 8
5.6 Accuracy 9
5.7 Test report 9
5.7.1 Standard tests 9
5.7.2 Non-standard tests 9
5.8 Good laboratory practice (GLP) 9

6 Alternative wire-insulation flammability test in a gas-flow environment (test B) 10
6.1 Principle 10
6.2 Conditions and limits 10
6.3 Test system 10
6.4 Test specimens 11
6.5 Procedure 12
6.5.1 General 12
6.5.2 Before testing 12
6.5.3 Test 14
6.6 Accuracy 15
6.7 Test report 15
6.7.1 Standard tests 15
6.7.2 Non-standard tests 15
6.8 Good laboratory practice 15

Annex A (informative) Preparation and qualification of chemical ignitors 16
