DIN 53428:2023-09 (E)

Testing of cellular materials - Determination of the resistance to liquids, vapours, gases and solid materials

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Principle 7

5 Designation 7
5.1 Symbols denoting ageing media 7
5.2 Designation 7

6 Apparatus 7

7 Test agents and equipment 8
7.1 General 8
7.2 Liquids 8
7.3 Gases and vapours 8
7.4 Solids 8

8 Preparation and shape of test specimens 9
8.1 Specimens for the determination of mass and changes in dimensions 9
8.2 Test specimens for the determination of changes in other properties 9

9 Number of test specimens 9

10 Conditioning of test specimens 9

11 Ageing procedure and determination of changes to the test specimens caused by test agents 9
11.1 Temperature 9
11.2 Duration of ageing 10
11.3 Recording of the atmospheric pressure 10
11.4 Examination of test specimens before ageing in the test medium (to obtain E1 values) 10
11.4.1 Determination of mass and dimensions 10
11.4.2 Determination of other properties 10
11.5 Examination of specimens during and at the end of ageing (to obtain E2 values) 10
11.5.1 Ageing in liquids 10
11.5.2 Exposure in gases and vapours 11
11.5.3 Ageing in solids 11
11.6 Removal of test specimens from test media 11
11.7 Examination of reconditioned test specimens with test medium removed (to obtain E3 values) 12
11.8 Examination of ageing medium (for extractable constituents of the test specimen according to 11.7 to obtain E4 values) 12

12 Evaluation 12

12.1 Symbols 12
12.2 Determination of absolute and relative changes in mass (in volume) and in dimensions .. 14
12.2.1 Test specimen mass 14
12.2.2 Test specimen volume 14
12.2.3 Test specimen dimensions 15
12.2.4 Other physical properties 15
12.3 Determination of the absorption of test agent by the test specimen (to be determined with specimen immersed) 15
12.4 Determination of changes in other properties of reconditioned specimens (E3) 15
12.5 Determination of changes in other properties of test specimens which give off constituents to the test liquid 16

13 Test report 16
