# DIN 53000-3:2023-07 (E)

## Viscometry - Measurement of kinematic viscosity by means of the Ubbelohde viscometer - Part 3: Calibration and determination of the uncertainty of measurement

## Contents

Page

**Foreword** ... 3
**1 Scope** ... 4
**2 Normative references** ... 4
**3 Terms and definitions** ... 4
**4 Symbols and units** ... 4
**5 Apparatus and working substances** ... 6
**5.1 General** ... 6
**5.2 Standard samples and calibration fluids** ... 6
**6 Viscometer calibration** ... 7
**6.1 General** ... 7
**6.2 Cleaning viscometers** ... 7
**6.3 Calibration with traceable standard samples** ... 7
**6.4 Calibration by direct comparison with standard viscometers** ... 9
**7 Uncertainty of measurement** ... 10
**7.1 General** ... 10
**7.2 Measurement uncertainty when measuring viscosity** ... 10
**7.3 Uncertainty of viscometer constants when calibrating with standard samples** ... 12
**7.4 Uncertainty of viscometer constants when calibrating by direct comparison using standard viscometers** ... 12
**7.5 Examples** ... 13
**8 Indication of the measurement result for viscometer calibration** ... 14
**Annex A** (informative) **Determining measurement uncertainty** ... 15
**Bibliography** ... 17

## Tables

**Table 1 — Symbols and units** ... 4
**Table 2 — Flow times for standard samples for viscometers of various sizes** ... 7
**Table 3 — Relative variance of the flow time as a function of *n* and $\varepsilon t$** ... 11
**Table 4 — Relative uncertainty of measurement for the viscosity determination and viscosity calibration calculated as in Equation (27) to Equation (29) as a function of the uncertainty of the standard viscometer or standard samples** ... 13
**Table A.1 — Multiplication factor $F1$ as a function of the number $n$ of single measurements** ... 16
**Table A.2 — Multiplication factor $F2$ as a function of the number $n$ of single measurements** ... 16
