European foreword 4

0 Introduction 5

1 Scope 8
1.2 Assumptions 8

2 Normative references 9

3 Terms, definitions and symbols 9
3.1 Terms and definitions 9
3.2 Symbols and abbreviations 11
3.2.1 Latin upper-case symbols 11
3.2.2 Latin lower-case symbols 12
3.2.3 Greek upper-case symbols 12
3.2.4 Greek lower-case symbols 13

4 Basis of design 14

5 Modelling 16
5.1 Geometrical models 16
5.1.1 General rules for geometrical modelling and discretization 16
5.1.2 Models using beam elements 16
5.1.3 Models using plate or shell elements 17
5.1.4 Models using solid elements 17
5.1.5 Multi-level and combined models 17
5.2 Support and load models 18
5.2.1 Definition of supports 18
5.2.2 Definition of loads 18
5.3 Material models 19
5.3.1 General 19
5.3.2 Material models for hot-rolled steels with a sharply defined yield point 20
5.3.3 Material models for hot-rolled steels with a rounded stress-strain curve, cold-formed steels and stainless steels 22
5.3.4 Advanced material models 25
5.4 Imperfections 25
5.4.1 Types of imperfection 25
5.4.2 Geometric imperfections 26
5.4.3 Residual stresses 26
5.4.4 Equivalent geometric imperfections 29
5.5 Imperfection combinations 33

6 Analysis 33
6.1 Structural analysis 33
6.1.1 General 33
6.1.2 Types of analysis 34
6.2 Thermal analysis 36

7 Verification and validation 36
7.1 General 36
7.2 Verification 37

7.3 Validation ... 38

8 Design methodology ... 40
8.1 Ultimate limit state (excluding fatigue) ... 40
8.1.1 General ... 40
8.1.2 Elastic resistance check - stress check ... 40
8.1.3 Plastic resistance check ... 41
8.1.4 Buckling resistance check ... 41
8.1.5 Evaluation method for analysis with material nonlinearity ... 44
8.2 Fatigue ... 45
8.2.1 General ... 45
8.2.2 Fatigue checking by the hot spot and effective notch stress method ... 46
8.2.3 Stress extrapolation for the hot spot stress method in joints ... 47
8.2.4 FE modelling - hot spot stress ... 52
8.2.5 FE modelling - effective notch stress ... 53
8.2.6 Additional considerations ... 54
8.3 Serviceability limit state ... 55

9 Documentation ... 55

Annex A (informative) Calculation of model factor (FE) ... 57

A.1 Use of this annex ... 57
A.2 Scope and field of application ... 57
A.3 Calculation of model factor (FE) ... 57

Annex B (informative) Stress concentrations ... 59

B.1 Use of this annex ... 59
B.2 Scope and field of application ... 59
B.3 Separation of stress concentration and numerical singularities ... 59
B.4 Consideration of stress concentration in design ... 60

Annex C (normative) Limits on maximum strains for beam finite elements ... 62

C.1 Use of this annex ... 62
C.2 Scope and field of application ... 62
C.3 Strain limits ... 62

Bibliography ... 66
