DIN EN ISO 21856:2022-12 (E)

Assistive products - General requirements and test methods (ISO 21856:2022)

Contents

Page

European foreword **5**

Foreword **6**

Introduction **7**

1 Scope **8**

2 Normative references **8**

3 Terms and definitions **10**

4 General requirements **14**
4.1 Risk analysis and management 14
4.2 Intended performance and technical documentation 15
4.3 Clinical evaluation and investigation 15
4.4 Assistive products that can be dismantled 15
4.5 Fasteners 15
4.6 Load limits 15
4.7 Immobilising means 16
4.8 Usability 16
4.9 Design requirements in relation to persons with sensory and cognitive impairments 16
4.10 Considerations for accessibility 16
4.11 Feedback 16

5 Materials **16**
5.1 General 16
5.2 Flammability 16
5.2.1 General 16
5.2.2 Upholstered parts, mattresses, bed bases, bedding and textiles 17
5.2.3 Polymeric parts 18
5.2.4 Electrical components 18
5.2.5 Wiring 18
5.3 Biocompatibility and toxicity 18
5.4 Contaminants and residues 19
5.4.1 General 19
5.4.2 Substances that can leak from an assistive product in intended use and in fault conditions 19
5.5 Infection and microbiological contamination 19
5.5.1 Introduction 19
5.5.2 Cleaning and disinfection 19
5.5.3 Machine washable assistive products 20
5.5.4 Animal tissue 21
5.6 Resistance to corrosion 21

6 Emitted sound and vibration **21**
6.1 Noise and vibration 21
6.2 Sound levels and frequencies of audible warning devices 21

7 Electromagnetic compatibility **22**

8 Electrical safety **22**
8.1 General 22

8.2 Battery powered assistive products - Charge level indicator 22
8.3 Electrically heated blankets, pads and similar flexible heating appliances 22
8.4 Ingress of liquids or particulate matter 22
8.4.1 Ingress of liquids 22
8.4.2 Ingress of particulate matter 23
8.5 Pendant controls 23

9 Overflow, spillage, leakage and ingress of liquids 23
9.1 Overflow 23
9.1.1 Requirements 23
9.1.2 Test method 23
9.2 Spillage 24
9.2.1 Requirements 24
9.2.2 Test method 24
9.3 Leakage 24
9.4 Ingress of liquids 24
9.4.1 Requirements 24
9.4.2 Test method 24

10 Surface temperature 24

11 Sterility 25
11.1 Sterility requirements 25
11.2 Sterilization processes 25
11.3 Maintenance of sterility in transit 26

12 Safety of moving parts 26
12.1 Squeezing 26
12.2 Mechanical wear 27
12.3 Emergency stopping functions 27

13 Means to prevent falling out 27
13.1 General 27
13.2 Protection against inadvertent user falls in relation to side rails 27

14 Prevention of traps for parts of the human body 29
14.1 Holes and clearances 29
14.2 V-shaped openings 30

15 Folding and locking mechanisms 30
15.1 General 30
15.2 Locking mechanisms 30
15.3 Prevention of trap and squeeze hazards 31

16 Carrying handles 31
16.1 General 31
16.2 Requirement 31
16.3 Test method 31

17 Assistive products that support or suspend users 32
17.1 General 32
17.2 Static forces 32
17.2.1 Assistive products that support users 32
17.2.2 Assistive products that suspend users 33
17.3 Dynamic forces 33
17.4 Requirements and test method for tips 33
17.4.1 General 33
17.4.2 Friction of tips 33
17.4.3 Durability of tips 33

18 Portable and mobile assistive products **34**
18.1 Portable assistive products 34
18.2 Mobile assistive products 34
19 Surfaces, corners, edges and protruding parts **35**
20 Hand-held assistive products **35**
21 Assistive products for children **36**
22 Stability **36**
23 Forces in soft tissues of the human body **37**
24 Ergonomic principles **37**
25 Requirements for information supplied by the manufacturer **37**
25.1 General 37
25.2 Instructions for use 38
25.2.1 General 38
25.2.2 Pre-sale information 38
25.2.3 User information 39
25.2.4 Service information 39
25.3 Labelling 40
26 Packaging **41**
27 Test report **41**
28 Guidelines for accessible information on assistive products **42**
Annex A (informative) **General recommendations** **43**
Annex B (informative) **Environmental and consumer related guidance** **51**
Annex C (informative) **Guidelines for accessible information on assistive products** **56**
Bibliography **60**
