Information technology – Home electronic system (HES) architecture – Part 5-1: Intelligent grouping and resource sharing for Class 2 and Class 3 – Core protocol

CONTENTS

FOREWORD 8
INTRODUCTION 9
1 Scope 10
2 Normative references 10
3 Terms, definitions and abbreviations 11
3.1 Terms and definitions 11
3.2 Abbreviations 12
4 Conformance 13
4.1 IGRS network 13
4.2 IGRS devices 13
5 IGRS architecture 14
5.1 Overview 14
5.2 IGRS Core Protocol 15
5.3 IGRS Application Profile 15
5.4 IGRS Application 16
5.5 IGRS and other standards 17
6 IGRS device interaction model 18
6.1 Overview 18
6.2 Device online 19
6.3 Device (group) discovery 19
6.4 Device pipe setup 19
6.5 Device group setup and join 20
6.6 Service discovery 20
6.7 Session setup 21
6.8 Service invocation 21
6.9 Session termination 21
6.10 Device/Service online/offline event subscription 21
6.11 Device/Service online/offline event notification 22
6.12 Device/Service online/offline event unsubscription 22
6.13 Pipe disconnection 22
6.14 Device group dismiss and secession 22
6.15 Device offline 23
7 IGRS message framework 23
7.1 Overview 23
7.2 IGRS request/notification message structure 24
7.3 IGRS response message structure 25
7.4 IGRS message based on secure device pipe 26
7.4.1 Message authentication code generation 26
7.4.2 Message encryption 27
8 IGRS device and service description 27
8.1 IGRS device description 27
8.1.1 Device description template 27
8.1.2 Device identifier 31
8.1.3 Device group identifier 31
8.1.4 Device type identifier 32
8.1.5 Device security mechanism descriptor 33

8.2 IGRS service description 40
8.2.1 Service description template 40
8.2.2 Service identifier 51
8.2.3 Service type identifier 51
8.2.4 Service access control 52
8.2.5 Identity authentication mechanism of service sccess control 53
8.3 IGRS client description 56
8.4 IGRS user description 56
IGRS device grouping 56
9.1 Device advertisement 56
9.1.1 Device online advertisement 56
9.1.2 Device offline advertisement 58
9.2 Device pipe management 58
9.2.1 Unsecure device pipe setup 58
9.2.2 Unsecure device pipe maintenance 58
9.2.3 Secure device pipe setup 59
9.2.4 Secure device pipe teardown 79
9.2.5 Device trust relationship 80
9.2.6 Device online detection 80
9.3 Detailed device description document retrieval 81
9.3.1 Retrieve detailed device description document request 81
9.3.2 Retrieve detailed device description document response 82
9.4 Retrieve detailed device description document based on non-secure pipe 84
9.5 Device group setup 84
9.5.1 Global peer-to-peer device group 84
9.5.2 Specified peer-to-peer device group 84
9.5.3 Centralised device group 86
9.6 Device search 90
9.6.1 Device search based on multicast 90
9.6.2 Device search by proxy 94
9.7 Device online/offline event subscription 97
9.7.1 Device online/offline event subscription request 97
9.7.2 Device online/offline event subscription renewal request 99
9.7.3 Device online/offline event subscription response 100
9.7.4 Device online/offline event unsubscription 101
9.7.5 Device online/offline event notification 102
9.8 Device group search 104
9.8.1 Device group search request message 104
9.8.2 Device group search response message 105
IGRS resource sharing 107
10.1 Service online advertisement 107
10.1.1 Service online advertisement based on mutilcast 107
10.1.2 Service online registration and offline notification based on device pipe 109
10.2 Service search 111
10.2.1 Service search based on multicast 111
10.2.2 Service search by proxy 114
10.3 Service online/offline event subscription 117
10.3.1 Service online/offline event subscription request 117

10.3.2 Service online/offline event subscription renewal request 119
10.3.3 Service online/offiline event subscription response 120
10.3.4 Service online/offline event unsubscription 121
10.3.5 Service online/offline event notification 122
10.4 Service description document retrieval 124
10.4.1 Retrieve service description document request 124
10.4.2 Retrieve service description document response 126
10.4.3 Other approaches to retrieve service description documents 127
10.5 Session 127
10.5.1 Session setup condition 127
10.5.2 Common session setup and teardown process 127
10.5.3 Session setup when service access control in master/slave device group is not consistent with device pipe security attribute 131
10.6 Service invocation 137
10.6.1 Service invocation request message 137
10.6.2 Service invocation response message 137
10.6.3 Notification message based on session 138
11 Request/response status codes 139
Annex A (normative) IGRS service discovery protocols (ISDP) 142
A.1 General 142
A.2 ISDP message format 142
A.2.1 General 142
A.2.2 ISDP start-lines 142
A.2.3 ISDP message headers 142
A.2.4 ISDP processing rules 143
A.3 ISDP usage in IGRS specification 143
Annex B (normative) Description documents 145
B.1 Specification description 145
B.2 Session description 249
B.3 Service description 250
B.4 Pipe description 253
B.5 Device template 254
B.6 Master slave device group advertisement 256
B.7 Device type list 256
B.8 Peer-to-peer device group advertisement 257
B.9 Device description 257
