DIN EN 16930:2017-10 (E)

Animal feeding stuffs - Methods of sampling and analysis - Determination of carbadox and olaquindox by HPLC/UV

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Principle 5

4 Reagents and materials 5
4.1 Water, demineralized or deionized or at least equivalent 6
4.2 Methanol 6
4.3 Acetonitrile 6
4.4 Glacial acetic acid, minimum purity 96 % 6
4.5 Ammonium acetate water free salt, CH3CO2NH4 6
4.6 Extraction solvent: methanol water mixture (1:1 v:v) 6
4.7 Ammonium acetate buffer, 25 mM, pH = 4,35 6
4.8 Mobile phase for HPLC: acetonitrile: buffer mixture (10:90; v:v) 6
4.9 Carbadox dissolving solvent: methanol: acetonitrile mixture (1:1; v:v) 6
4.10 Reference standards 6
4.11 Standard solutions 6
4.12 Neutral aluminium oxide, Brockmann activity I 8
4.13 Neutral aluminium oxide SPE cartridge, 2 cm3, 1850 mg 8
4.14 Technical methanol 8

5 Apparatus 8
5.1 pH meter 8
5.2 Solvent filtration system, suitable for 0,45 µm membrane filters 8
5.3 Ultrasonic bath 8
5.4 Rotary on mechanical shaker 8
5.5 Centrifuge 8
5.6 Glass wool 8
5.7 Glass column for chromatography, length 200 mm to 400 mm; internal diameter 10 mm, restricted at the end and fitted with a wad of glass wool (5.6) or equivalent column 8
5.8 Filter papers or glass microfibre filter 8
5.9 Cellulose acetate membrane filters of pore size 0,45 µm 8
5.10 PVDF syringe filters of pore size 0,45 µm and adaptable syringes 8
5.11 HPLC system 8
5.12 Refrigerator or refrigerated chamber at a temperature set between 0 °C and 8 °C 9

6 Sampling 9

7 Preparation of test sample 9
7.1 General 9
7.2 Laboratory sample 9
7.3 Test sample 9
7.4 Test portion 9

8 Procedure 9
8.1 Extraction of feeding stuffs containing 0,5 mg/kg to 100 mg/kg of growth promoters 9
8.2 Filtration 9
8.3 Purification 9

8.4 HPLC analysis 10
8.5 System suitability - Confirmation 11

9 Calculation 12

10 Precision 13
10.1 Collaborative study 13
10.2 Repeatability 13
10.3 Reproducibility 13

11 Test report 14

Annex A (informative) Results of the collaborative study 15

A.1 Procedure 15
A.2 Materials 15
A.3 Statistical analysis of results 17
A.4 Results and interpretation 17
A.5 Example chromatogram 24
