DIN EN 15807:2011-05 (E)

Railway applications - Pneumatic half couplings

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and abbreviations 5
3.1 Terms and definitions 5
3.2 Abbreviations 6

4 Design and manufacture 7
4.1 Requirements 7
4.1.1 Brake pipe 7
4.1.2 Main reservoir pipe 7
4.1.3 Flexible hose 7
4.1.4 Ring-shaped elastomer joints 10
4.1.5 Coupling heads 11
4.2 Compressed air quality 18
4.3 Ambient temperature 19
4.4 Environmental corrosion conditions 19
4.5 Leakage 19
4.6 Mechanical strength of assembly 19
4.7 Vacuum withstand 19
4.8 External appearance 19
4.9 Fire behaviour 19

5 Type test methods 20
5.1 Sampling for type test 20
5.2 Test requirements 20
5.3 Test procedure flexible hose 20
5.3.1 Nature and proportion of the tests and inspections 20
5.3.2 Preparation of the test pieces 22
5.3.3 Bend test 22
5.3.4 Pressure test 23
5.3.5 Bursting test 23
5.3.6 Adhesion of the reinforcement 24
5.3.7 Test of dynamic fatigue through repeated tensile loadings of the internal and external layers 25
5.3.8 Test for residual deformation through static tensile loading after ageing 25
5.3.9 Impact test 25
5.3.10 Test for Resistance to ozone cracking of the external layer under static conditions 27
5.3.11 Deflection at low temperature 27
5.3.12 Test for fitting of connections on hoses 29
5.3.13 Uncoupling test 31
5.3.14 Flare test 31
5.3.15 Hardness test 32
5.4 Test procedure ring-shaped elastomer joints 32
5.4.1 Nature and proportion of the tests and inspections 32
5.4.2 Preparation of the test pieces 34
5.4.3 Hardness test 34
5.4.4 Tensile strength test 34
5.4.5 Deformation tests 34

5.4.6 Water tightness test ... 36
5.5 Test procedure pneumatic half coupling ... 36
5.5.1 Principle ... 36
5.5.2 Check of physical and geometrical characteristics ... 37
5.5.3 Hydraulic test of the assembly at given pressure ... 37
5.5.4 Leakage ... 37
5.5.5 Corrosion test ... 39
5.5.6 Pull test ... 39
5.6 Documentation ... 40

6 Individual inspection ... 40

7 In-Service assessment ... 41

8 Designation ... 41

9 Identification and marking ... 41

Annex A (informative) Vacuum withstand ... 42

Annex B (informative) MRP pneumatic half coupling for emergency coupling hoses ... 43

B.1 General ... 43
B.2 Coupling head ... 43
B.3 Identification ... 43

Annex C (informative) In-service trial ... 45

C.1 General ... 45
C.2 Test set-up and sampling ... 45
C.3 Procedure ... 45
C.4 Pass/fail criteria ... 45

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC ... 46

Bibliography ... 50
