ISO 24211:2022-08 (E)

Vapour products - Determination of selected carbonyls in vapour product emissions

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2

5 Reagents 2
5.1 General 2
5.2 Solution preparation 3
5.3 Preparation of standards 3
5.3.1 General 3
5.3.2 HPLC calibration standards and working solutions 3
5.3.3 Primary carbonyl standards 3
5.3.4 Secondary carbonyl standards 4
5.3.5 Carbonyl working standards 4

6 Apparatus 4

7 Procedure 5
7.1 Preparation of test samples 5
7.2 Glass fibre filter pads handling 5
7.3 Aerosol collection and sample preparation 5
7.4 Determination of aerosol collected mass (ACM) and e-liquid vaporised mass (EVM) 6
7.5 Test portion 6
7.6 Setting up the apparatus 7
7.7 Calibration of the HPLC system 8
7.8 Determination 8

8 Expression of the results 8

9 Repeatability and reproducibility 9
9.1 General 9
9.2 Results of an interlaboratory study 9

10 Test report 11

Annex A (informative) DNPH solution (prepared with DNPH containing approximately 30 % water) 12

Annex B (informative) Example of calibration standards preparation 14

Annex C (informative) HPLC chromatogram of a typical aerosol sample containing carbonyls 15

Bibliography 16
