Foreword 2

Introduction 3

1 Scope 4

2 Terms and definitions 4

3 Symbols and abbreviated terms 5
3.1 Symbols 5
3.2 Abbreviated terms 5

4 Principle of the procedure 5

5 Reagents, apparatus and materials 5

6 Measurement procedure 8
6.1 Sampling 8
6.2 Sample preparation 8
6.3 HPLC analysis 9

7 Establishment of the calibration function and verification of the measurement values 9
7.1 Identification 9
7.2 Instrument calibration 10
7.3 Determination of response factors and quantification 10
7.4 Determination of the extraction efficiency 12

8 Calculation of the result 12

9 Performance characteristics 12
9.1 Standard deviations of the overall measurement procedure 12
9.2 Detection limits 12

10 Interferences 14

11 Quality assurance 14

12 Test report 15

Annex A (informative) General information 16

Annex B (informative) Examples of operation parameters for HPLC analysis with FLD and DAD in series 17

Annex C (informative) Extraction efficiencies for some PAH compounds 20

Annex D (informative) Results of duplicate measurements 21

Annex E (informative) Comparison measurements and invariance test of the PAH profiles 23

Annex F (informative) Physical constants of PAHs 24

Annex G (informative) List of HPLC columns 28

Bibliography 29
