DIN EN ISO 11690-2:2021-04 (E)

Acoustics - Recommended practice for the design of low-noise workplaces containing machinery - Part 2: Noise control measures (ISO 11690-2:2020)

Contents

Page

European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Termsanddefinitions 6

4 Technical aspects of noise control 6

5 Noise control at source 8
5.1 General 8
5.2 Noise control at source by design 8
5.3 Information on noise emission 9
5.4 Use of low-noise machines 9
5.5 Modification or replacement of machine components 12
5.6 Low noise working and production technologies 13
5.7 Maintenance of machines and noise control devices 13

6 Noise control on the transmission path 13
6.1 Noise control by means of a proper spatial arrangement of the noise sources 13
6.2 Use of noise control devices 13
6.3 Noise control by use of sound-absorbing materials 13
6.4 Sound propagation in structures and noise control measures 16

7 Noise control at the work station 16

8 Verificationmethods 17
8.1 General 17
8.2 Sound sources 17
8.3 Noise control devices 17
8.4 Workroom 17
8.5 Specified positions, work stations 17

9 New technologies 18

Annex A (informative)Modificationorreplacementofmachinecomponents 19

Annex B (informative) Arrangement of sound sources 21

Annex C (informative) Enclosures 22

Annex D (informative) Silencers 25

Annex E (informative) Noise barriers and screens in rooms 26

Annex F (informative) Acoustical treatment of surfaces 27

Annex G (informative) Structure-borne sound insulation 29

Annex H (informative) Airborne sound insulation of partitions 30

Annex I (informative) Noise control at the work station 31

Annex J (informative) Example of a new technology 32

Bibliography 34
