ISO 23308-2:2025-06 (E)

Energy efficiency of industrial trucks - Test methods - Part 2: Operator-controlled self-propelled trucks, burden and personnel carriers and towing tractors

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Test conditions 2

5 Measurement procedure 2
5.1 General 2
5.2 Test layout 2
5.3 Operating requirements and sequence for counterbalance lift trucks and comparable truck designs 3
5.4 Operating requirements for other types of self-propelled trucks 4
5.4.1 General 4
5.4.2 Operating sequence for reach trucks 4
5.4.3 Operating sequence for straddle trucks, pallet-stacking trucks, double-stacker trucks and stacking tractors 5
5.4.4 Operating sequence for pallet and stillage trucks, pallet trucks end-controlled, centre-controlled order picking trucks 5
5.4.5 Operating sequence for towing tractors and burden carriers 6

6 Documentation 7
6.1 General 7
6.2 Test report 7
6.3 Declaration 7
