Foreword ... 4

NA.1 Scope ... 5

NA.2 National provisions ... 5
NA.2.1 General ... 5
NA.2.2 National provisions ... 6
NCI re 1.2 Normative references ... 6
NCI re 1.5 Terms and definitions ... 7
NDP re 2.1.3.2(1)P Design working life ... 7
NCI re 2.3.1 Lower dynamic amplification factors ... 7
NCI re 2.3.1 Combined action of cranes ... 7
NCI re 2.3.1 Analysis for safety against seismic action ... 7
NDP re 2.8(2)P Partial factor $\gamma_{F,test}$ for crane test loads ... 7
NCI re 2.8(2) P Crane test loads ... 7
NCI re 3.1 Steel grades up to S700 ... 7
NDP re 3.2.3(1) Lowest service temperature for indoor crane supporting structures ... 7
NDP re 3.2.3(2)P Selection of suitable toughness of members under compression ... 8
NDP re 3.2.4(1) Table 3.2, Target values for Z_{Ed} for through-thickness properties ... 8
NCI re 3.2.5 tolerances ... 8
NDP re 3.6.2(1) Information on suitable rails and rail steels ... 8
NDP re 3.6.3(1) Information on special connecting devices for rails ... 8
NCI re 5.7.3(1) Local bending stresses in the web due to eccentricity of wheel loads ... 8
NCI re 5.8 Superposition of local bending stresses in the bottom flange due to wheel loads ... 8
NCI re 5.8 (6) Crane tests ... 8
NDP re 6.1(1) Partial factors γ_{Mi} for resistance in ultimate limit state analysis ... 9
NDP re 6.3.2.3(1) Alternative assessment method for lateral torsional buckling ... 9
NCI re 7.3 Load groups — Supplementing the serviceability limit state ... 9
NDP re 7.3(1) Limits for deformation and displacement ... 9
NCI re 7.3(1) Limits for deformation and displacement ... 10
NCI re 7.5 Dynamic amplification factors for verifying reversible behaviour ... 10
NDP re 7.5(1) Partial factors $\gamma_{M,ser}$ for resistance in the serviceability limit state ... 10
NDP re 8.2(4) High-fatigue crane classes ... 10
NCI re 8.5.2 Crane classes for rigid rail fixings ... 10
NCI re 8.5.3 Expansion joints ... 11
NDP re 9.1(2) Limits for number of cycles C_0 without fatigue assessment ... 11
NDP re 9.2(1)P Partial factor γ_{Ff} for fatigue loads ... 11
NDP re 9.2(2)P Partial factor γ_{Mf} for fatigue resistance ... 11
NCI re 9.3.2(3) Simplified approach ... 11
NDP re 9.3.3(1) Crane classes for which bending stresses due to lateral eccentricity can be ignored ... 11
NDP re 9.4.2(5) Damage equivalence factor λ_{dup} for cranes acting together ... 11

Tables

Table NA.1 — Dynamic factors for load groups to be considered as a single characteristic crane action ... 9

Table NA.2 — Limit values for displacement ... 10

Table NA.3 — Required number of inspection intervals ... 11
