# ISO 15531-42 :2005-09 (E)

**Industrial automation systems and integration_- Industrial manufacturing management data: Resources usage management_- Part_32: Conceptual model for resources usage management data**

## Content

Page

1 Scope ....1

2 Normative references....1

3 Terms, definitions and abbreviations ....2

3.1 Terms and definitions ....2
3.2 Abbreviations ....7

4 ISO 15531 general....7

5 Conceptual information model for resources usage management data ....8

5.1 Structure of the schema ....8
5.1.1 Resource hierarchy ....9
5.1.2 Structure of resource characteristic ....9
5.1.3 Resource status ....9
5.1.4 Definition of resource views ....9
5.1.5 Definition of resource characteristics ....9
5.1.6 Resource configuration....9
5.2 Schema definition....10
5.3 Resources usage management type definitions ....11
5.3.1 Resource classification type ....11
5.4 Resources usage management entity definitions ....11
5.4.1 resource, library_resource_assignment and library_property_assignment....11
5.4.2 Resource hierarchy ....13
5.4.3 Structure of resource characteristics....15
5.4.4 Resource status ....17
5.4.5 Definition of resource views ....17
5.4.6 Definition of resource characteristics ....19
5.4.7 resource_configuration....21

Annex A (normative) Use of ASN.1 Identifiers in SC4 standards....22

Annex B (informative) RIM usage cases ....23

Annex C (informative) EXPRESS listing ....31

Annex D (informative) EXPRESS-G diagram....34

Bibliography....36

Index....37
