ISO/TS 12180-1:2003-12 (E)

Geometrical Product Specifications (GPS) - Cylindricity - Part 1: Vocabulary and parameters of cylindrical form

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1
3.1 General terms 1
3.2 Terms relating to the surface 2
3.3 Terms relating to the reference cylinder 4
3.4 Terms relating to the circumference and the generatrix 5
3.5 Terms relating to the filter function 5
3.6 Parameters 7

4 Radial cross-section deviations 10

5 Straightness deviations 10

Annex A (informative) Mathematical definition of cylindricity tolerances of nominal integral features 11

Annex B (informative) Consideration in the assessment of deviations from cylindrical form 12

Annex C (informative) Synoptic tables of terms, abbreviations and parameters 14

Annex D (informative) Relation to the GPS matrix model 16
