DIN 55473:2021-07 (E)

Auxiliary means of packaging - Desiccant in bag - Technical delivery conditions

Contents

Page

Foreword ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 5

4 Requirements ... 6
4.1 Desiccants ... 6
4.1.1 General ... 6
4.1.2 pH value of the aqueous extract ... 6
4.1.3 Electrical conductivity of the aqueous extract ... 6
4.1.4 Content of water-soluble substances ... 6
4.1.5 Particle size ... 6
4.2 Desiccant unit ... 7
4.2.1 Adsorptive capacity ... 7
4.2.2 Rate of adsorption ... 7
4.2.3 Volume ... 7
4.2.4 Mass ... 7
4.3 Desiccant bag ... 7
4.3.1 Wrapping material ... 7
4.3.2 Type of bags ... 8
4.3.3 Number of desiccant units (TME) per desiccant bag (TMB) ... 8
4.4 Designation ... 8

5 Testing ... 8
5.1 General ... 8
5.2 Desiccants ... 8
5.2.1 pH value and electrical conductivity of the aqueous extract ... 8
5.2.2 Content of water-soluble substances ... 8
5.2.3 Particle size ... 8
5.3 Desiccant unit ... 9
5.3.1 Adsorptive capacity ... 9
5.3.2 Volume and mass ... 11
5.3.3 Rate of adsorption ... 11
5.4 Desiccant bag ... 12
5.4.1 Dust permeability ... 12
5.4.2 Strength of the bag ... 13

6 Consignment ... 13
6.1 General ... 13
6.2 Group package ... 13
6.3 Number of desiccant bags per group package ... 13
6.4 Means of attachment ... 14
6.5 Marking ... 14
6.5.1 Desiccant bag ... 14
6.5.2 Group package ... 14

7 Quality testing ... 14
7.1 Visual and dimensional inspection ... 14
7.2 Production testing ... 15

8 Inspection 16
8.1 General 16
8.2 Records 16
8.3 Test report 16
