DIN EN ISO 11607-1:2020-05 (E)

Packaging for terminally s terilized medical devices - Part 1: Requirements for materials, sterile barrier systems and packaging systems (ISO 11607-1:2019)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **6**

4 General requirements ... **11**
4.1 Quality systems ... 11
4.2 Risk management ... 11
4.3 Sampling ... 11
4.4 Test methods ... 11
4.5 Documentation ... 12

5 Materials, preformed sterile barrier systems and sterile barrier systems ... **12**
5.1 General requirements ... 12
5.2 Microbial barrier properties ... 15
5.3 Compatibility with the sterilization process ... 16
5.4 Labelling system ... 16
5.5 Storage and transport of materials and preformed sterile barrier systems ... 16

6 Design and development for packaging systems ... **17**
6.1 General ... 17
6.2 Design ... 17

7 Usability evaluation for aseptic presentation ... **18**

8 Packaging system performance and stability ... **19**
8.1 General ... 19
8.2 Packaging system performance testing ... 19
8.3 Stability testing ... 20

9 Packaging system validation and changes ... **20**

10 Inspection immediately prior to aseptic presentation ... **21**

11 Information to be provided ... **21**

Annex A (informative) **Guidance on medical packaging** ... **22**

Annex B (informative) **Standardized test methods, guides and procedures that can be used to demonstrate conformity with the requirements of this document** ... **25**

Annex C (normative) **Test method for resistance of impermeable materials to the passage of air** ... **36**

Annex D (informative) **Environmental aspects** ... **37**

Annex E (informative) **Draft guidance on ways to differentiate a sterile barrier system from protective packaging** ... **38**

Bibliography ... **43**
