Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 General requirements 7

5 Indicator system format 8

6 Performance requirements 8

7 Packaging and labelling 10

8 Quality assurance 11

Annex A (normative) Determination of indicator strength during and after steam sterilization 12

Annex B (normative) Standard test cycles 14

Annex C (normative) Estimation of visual difference between colour of the substrate and of the changed or unchanged indicator system by determination of relative reflectance density 19

Annex D (normative) Determination of uniform colour change on exposure to saturated steam 23

Annex E (normative) Determination of equivalence of the alternative indicator to the Bowie and Dick test 24

Annex F (normative) Determination of reproducibility of fail conditions created in a standard test pack by air injection, air leak and retained air systems 26

Annex G (normative) Determination of indicator colour change on exposure to dry heat 30

Annex H (normative) Determination of shelf life of product 31

Annex I (normative) Accelerated ageing of test samples 32

Annex J (normative) Steam exposure apparatus and steam for test purposes 33

Annex K (normative) Standard test pack 36

Annex L (normative) Air injection system 37
