

ISO 28961:2012-01 (E)

Acoustics - Statistical distribution of hearing thresholds of otologically normal persons in the age range from 18 years to 25 years under free-field listening conditions

| Contents | Page |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Calculation of percentiles of hearing threshold distribution | 2 |
| 3.1 General | 2 |
| 3.2 Threshold distribution at frequencies lower than 10 000 Hz | 2 |
| 3.3 Threshold distribution at 10 000 Hz and higher frequencies | 4 |
| Annex A (informative) Numerical examples to illustrate the procedure | 5 |
| Annex B (informative) Selected values of the statistical distribution of hearing thresholds of otologically normal persons in the age range 18 years to 25 years inclusive | 6 |
| Annex C (informative) Selected values of z_x | 9 |
| Annex D (informative) Notes on the derivation of the statistical distribution of normal hearing thresholds | 10 |
| Bibliography | 11 |
