

# ISO 28961:2012-01 (E)

Acoustics - Statistical distribution of hearing thresholds of otologically normal persons in the age range from 18 years to 25 years under free-field listening conditions

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 Scope .....		1
2 Normative references .....		1
3 Calculation of percentiles of hearing threshold distribution .....		2
3.1 General .....		2
3.2 Threshold distribution at frequencies lower than 10 000 Hz .....		2
3.3 Threshold distribution at 10 000 Hz and higher frequencies .....		4
Annex A (informative) Numerical examples to illustrate the procedure .....		5
Annex B (informative) Selected values of the statistical distribution of hearing thresholds of otologically normal persons in the age range 18 years to 25 years inclusive .....		6
Annex C (informative) Selected values of $z_x$ .....		9
Annex D (informative) Notes on the derivation of the statistical distribution of normal hearing thresholds .....		10
Bibliography .....		11
