ISO 25250:2026-09 (E)

Carbon fixation rate in farmed macroalgae - Method for sampling and analysis

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Determination of carbon fixation rate in farmed macroalgae 2
4.1 Carbon fixation form 2
4.2 Total carbon content of organism measured by the total mass of carbon element 2
4.3 Carbon fixation rate measured by the mass of CO2 2
4.4 Carbon fixation of macroalgae seedlings 2
4.5 Dissolved organic carbon and particulate organic carbon 3
4.6 Carbon fixation rate in macroalgae measured by carbon fixation in the macroalgae culture cycle 3

5 Method for sampling and analysis procedures on carbon fixation rate in farmed macroalgae 3
5.1 Basic procedures 3
5.2 Instruments, equipment and reagents 3
5.2.1 Instruments and equipment 3
5.2.2 Reagents 3
5.3 Sampling 4
5.3.1 Representativeness 4
5.3.2 Timing 4
5.4 Pre-treatment 4
5.5 Determination of moisture content in farmed macroalgae 4
5.6 Determination of carbon content in macroalgae sample by thermal conductivity method 5
5.6.1 Principle 5
5.6.2 Processing of test sample 5
5.6.3 Instrument calibration 5
5.6.4 Sample analysis 5
5.6.5 Record and calculation 6
5.6.6 Repeatability 6
5.7 Carbon content in fresh sample of macroalgae 6
5.8 Calculation of the carbon fixation rate of farmed macroalgae 6

Annex A (informative) Carbon content of common farmed macroalgae 7

Bibliography 8
