

ISO/IEC 14543-5-3:2012-02 (E)

Information technology - Home electronic system (HES) architecture - Part 5-3: Intelligent grouping and resource sharing for HES Class 2 and Class 3 - Basic application

Contents	Page
FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references	5
3 Terms, definitions and abbreviations	6
3.1 Terms and definitions	6
3.2 Abbreviations	6
4 Conformance.....	7
5 Overview	7
5.1 Summary.....	7
5.2 Design criteria	8
5.2.1 Relationship between basic application and IGRS	8
5.2.2 Relationship between basic application and transport protocol	8
5.2.3 Relationship between basic application and existing file sharing system.....	8
5.2.4 Relationship between basic application and file format	8
5.2.5 Basic application interaction model.....	8
5.2.6 Design principle.....	9
5.3 Explanation remarks.....	10
6 Digital media forwarding, storage and playback system	10
6.1 Overview	10
6.2 Media interaction flow selection.....	11
6.3 Specific description of digital media forwarding, storage and playback system	12
6.4 Software profile of digital media forwarding, storage and playback system	14
6.5 Software interfaces	16
6.6 Hardware interfaces	16
6.6.1 Network interfaces.....	16
6.6.2 Media Client interface.....	17
Bibliography.....	18
Figure 1 – IGRS application interaction model	9
Figure 2 – IGRS TV application scenario	11
Figure 3 – Media interaction model	12
Figure 4 – Software profile of digital media forwarding, storage and playback system	16
Table 1 – Protocol conformance.....	12
Table 2 – Function description	13
Table 3 – Media format supported.....	14
Table 4 – Network interfaces	17
Table 5 – Media Client interfaces.....	17
