ISO 12945-3:2020 (E)

Textiles — Determination of fabric propensity to surface pilling, fuzzing or matting — Part 3: Random tumble pilling method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus and auxiliary materials

5.1 Apparatus
5.2 Auxiliary materials

6 Preparation of test specimens

6.1 Pretreatment of the laboratory sample
6.2 Sampling of test specimens
6.3 Fixation of test specimen edges
6.4 Number of test specimens and marking

7 Preparation of polychloroprene liners

8 Conditioning and testing atmosphere

9 Procedure

10 Assessment of pilling, fuzzing and matting

11 Results

12 Test report

Annex A (normative) Checking of apparatus and preparation of liners

A.1 Checking of apparatus
A.2 Preparation of liners
A.2.1 Cleaning and drying of polychloroprene liners
A.2.2 Running-in of new polychloroprene liners

Annex B (informative) Alternative procedure

B.1 Principle
B.2 Number of test specimens and marking
B.3 Alternative procedure

Annex C (informative) Rationale
