

ISO 11665-1:2012-07 (E)

Measurement of radioactivity in the environment - Air: radon-222 - Part 1: Origins of radon and its short-lived decay products and associated measurement methods

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions and symbols	1
3.1	Terms and definitions	1
3.2	Symbols	8
4	Principle	9
5	Equipment	9
6	Sampling	10
6.1	General	10
6.2	Sampling objective	10
6.3	Sampling characteristics	10
6.4	Sampling conditions	11
7	Detection	12
7.1	Silver-activated zinc sulphide ZnS(Ag) scintillation	12
7.2	Gamma-ray spectrometry	13
7.3	Liquid scintillation	13
7.4	Air ionization	13
7.5	Semi-conductor (alpha detection)	13
7.6	Solid-state nuclear track detectors (SSNTD)	13
7.7	Discharge of polarised surface inside an ionization chamber	13
8	Measurement	13
8.1	Methods	13
8.2	Influence quantities	14
8.3	Calibration	15
8.4	Quality control	15
9	Expression of results	15
10	Test report	15
Annex A (informative) Radon and its decay products -- General information		17
Annex B (informative) Example of results of spot, integrated and continuous measurements of radon-222 activity concentration		25
Annex C (informative) Example of a test report		27
Bibliography		28
