ISO 15531-43:2006-08 (E)

Industrial automation systems and integration - Industrial manufacturing management data - Part 43: Manufacturing flow management data: Data model for flow monitoring and manufacturing data exchange

Contents

Page

1 Scope 1
2 Normative references 1
3 Terms, definitions, and abbreviations 2
3.1 Terms and definitions 2
3.2 Abbreviations 7
5 Manufacturing flow management data 8
5.1 Management of manufacturing flows 8
5.2 Fundamental concepts and assumptions 10
5.3 Manufacturing flow management data schema definition 12
5.4 manufacturing flow management data type definitions 13
5.4.1 type_of_flow 13
5.4.2 type_of_material_flow 13
5.5 Manufacturing flow management data subtype constraint definitions 14
5.5.1 material_information 14
5.5.2 rawmat_component 14
5.6 Manufacturing flow management dataentity definitions 14
5.6.1 process 14
5.6.2 flow 15
5.6.3 Process flow assignment 16
5.6.4 process_property_value 16
5.6.5 flow_property_value 16
5.6.6 material_flow 17
5.6.7 information_flow 17
5.6.8 raw_material 18
5.6.9 component 18
Annex A (normative) Use of ASN.1 Identifiers in SC4 standards 19
Annex B (informative) EXPRESS listing 20
Annex C (informative) EXPRESS-G diagram 23
